(c) As reported by BSNL they have taken number of steps to streamline the procedure for providing POIs and majority of POIs are currently being provided within 90 days to 120 days time, though the interconnection agreement between BSNL and the private operators provides a time frame of 12 months.

Many a times provision of POI is delayed even if BSNL has made necessary arrangements, due to the non-readiness of the private operators. Operators are also continuously announcing new tariff plans which lead to spurt in traffic and thereby congestion in some places. Additional POI capacity required cannot be provided immediately as due process has to be followed and at many places interconnect capacity is also not readily available.

Further, BSNL has requested private operators to give their demand forecast so that advance planning for procurement of equipment, needed for provision of POIs, can be done to the extent feasible.
